

Questions that assessment can help answer?

- Are our students learning what we think is important?
- Are our students learning what they need to succeed in their future endeavors?
- Should we modify our learning goals? Are we expecting too much or too little from our students?
- Are we getting better at helping our students learn?
- Do recent innovations, such as online learning or learning communities, help students learn more effectively?
- Should our curriculum and/or teaching strategies be modified?
- Should this program be expanded, maintained, cut back, or eliminated?
- Is this course, program, or institution of appropriate quality, value, and worthy of investment or support?
